Male

Examination	University	Institute	Year	CGPA/%
Graduation	GTU(Computer)	LDCE Ahmedabad	2022-26	7.92
HSC	GSEB	H.S Shah High School, Jambusar	2022	79.05
SSC	GSEB	Navyug Vidhyalaya, Jambusar	2020	88.50

PROJECTS

- **OrbitOps** ([view](#))
 - Built a full-stack space dashboard with React, Three.js, GSAP, and Zustand featuring a procedural GLSL Earth globe, animated HUD, and a production-grade lazy-loaded canvas architecture.
 - Integrated 4 live public APIs (NASA NeoWs, NOAA SWPC, ISS, Space Devs) utilizing custom Canvas views to engineer real-time asteroid radar charts and track satellite orbital data configurations.
- **CodeSense AI** ([View](#))
 - Developed a full-stack AI code review web app using React, Redux Toolkit, Node.js, Express, and MongoDB with Integrated Firebase Google/GitHub OAuth mechanisms
 - Integrated Google Gemini API via Octokit pipelines to perform automated code reviews across 15+ languages, parsing structured JSON issue scoring directly into pull request inline feedback.
- **QuestLog** ([view](#))
 - Designed a scalable full-stack gaming hub using React, Node.js, Express, MongoDB, and Redis caching to process real-time library updates via Socket.io channels.
 - Engineered secure REST APIs mapped to IGDB and Steam interfaces to build optimized backlog trackers, custom playtime metrics, and automated progress synchronization dashboards.
- **Gov-Doc-Vault** ([view](#))
 - Developed a secure document storage management portal using Vanilla JavaScript, Firebase Authentication, Firestore, and Firebase Storage optimized for PDF/image asset operations.
 - Enforced structural data privacy via OTP phone logins, role-based metadata control filters, family sharing workflows, and rigid owner-only Firestore backend security policies.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, C, SQL
- **Frontend & Backend:** React.js, Node.js, Express.js, HTML, CSS, Tailwind CSS
- **Databases & Tools:** MongoDB, PostgreSQL, Firebase, Git, GitHub, REST APIs, Git, Github

WORK EXPERIENCE & INTERNSHIPS

- **MERN Stack Intern | Unified Mentor** (Jan'26-April'26)
 - Participating in a comprehensive MERN stack training program focusing on advanced JavaScript, React.js, and MongoDB to build scalable web architectures.
 - Gained hands-on exposure to building production-ready applications, including a secure government document portal with Firebase OTP and a real-time chat platform via WebSockets.
 - Learning to optimize performance and deploy cloud-integrated solutions using AWS S3, CloudFront, and automated CI/CD pipelines with Vercel and Netlify.
- **Full-Stack Developer Intern | TatvaSoft** (July'25-july'25)
 - Gained hands-on experience in full-stack development using Angular, .NET Core (C#), PostgreSQL and Entity Framework.
 - Built and deployed a mini-project with Role-Based Authentication, CRUD operations, and LINQ queries following the Code First Approach.
 - Learned and applied AWS deployment strategies and explored tools like Swagger for API testing and documentation.
 -

ACHIVEMENT

- Completed Java Full Stack Development course on Udemy
- Solved 300+ problems using Java across multiple coding platforms

AREA OF INTEREST

- AI
- Full Stack Web Development

HOBBY

- History and Science
- Playing Chess
